

KATHERINE "KAT" WILSON

SUMMARY

Highly experienced Senior API Engineer with a proven track record of designing and implementing scalable, fault-tolerant, and secure microservices-based architectures. Skilled in Java, Spring Boot, and Kafka, with expertise in database schema design and SQL optimization. Strong passion for clean code, collaboration, and process improvement.

SKILLS

- Java 8/11
- Spring Boot 2.x
- Apache Kafka 2.x
- Microservices Architecture
- SQL (PostgreSQL, MySQL)
- Docker and Kubernetes
- Agile Methodologies (Scrum, Kanban)
- Git and SVN

EXPERIENCE

Senior API Engineer, NovaTech Inc. (2018-Present)

- Designed and developed multiple RESTful APIs using Spring Boot, utilizing Kafka for real-time data processing and asynchronous communication between microservices.
- Collaborated with cross-functional teams to implement CI/CD pipelines, improving deployment efficiency and reducing downtime.
- Participated in code reviews, providing constructive feedback and contributing to a culture of continuous improvement.

API Engineer, Apex Solutions (2015-2018)

- Developed and maintained a suite of APIs for a large e-commerce platform, utilizing Java and Spring Boot to achieve high scalability and performance.
- Worked closely with the QA team to identify and resolve issues, implementing unit testing and integration testing to ensure robust API functionality.
- Collaborated with the DevOps team to implement a containerization strategy, utilizing Docker and Kubernetes to optimize resource utilization.

API Developer, Zenith Corporation (2012-2015)

- Designed and developed multiple APIs for a cloud-based services platform, utilizing Java and SQL to create a scalable and efficient architecture.
- Worked with the database team to optimize database schema and queries, improving performance and reducing latency.
- Participated in code reviews and contributed to the development of best practices for API development.

EDUCATION

Bachelor of Science in Computer Science, Cyberia University (2012)
