

KAILYN J. RYAN

SUMMARY

Highly motivated and detail-oriented Machine Learning Operations Engineer with 5+ years of experience in designing, developing, and deploying scalable machine learning models to production. Proven track record of improving model performance and reducing deployment time by 30%.

SKILLS

Programming languages: Python

Machine learning libraries: scikit-learn, XGBoost

Model deployment frameworks: TensorFlow, Docker

Cloud platforms: AWS, Google Cloud

Version control: Git, SVN

Agile development methodologies: Scrum, Kanban

EXPERIENCE

Machine Learning Engineer

DataPulse Inc., San Francisco, CA (2018-2020)

- * Developed and deployed a customer churn prediction model using XGBoost and scikit-learn, resulting in a 25% reduction in customer churn rate
- * Collaborated with cross-functional teams to integrate machine learning models into the company's data pipeline, improving model training and deployment time by 40%
- * Implemented a data validation framework using Python and scikit-learn to ensure data quality and consistency across the organization

Senior Machine Learning Operations Engineer

Predicta Inc., Boston, MA (2020-Present)

- * Designed and implemented a model deployment pipeline using Docker and Kubernetes, reducing deployment time from 24 hours to 30 minutes
- * Worked closely with the data science team to optimize model performance and accuracy, resulting in a 15% improvement in model precision
- * Developed and maintained a model monitoring and logging framework using Python and TensorFlow, enabling real-time model performance tracking and issue resolution

Machine Learning Engineer

NovaTech Inc., New York, NY (2015-2018)

- * Built and deployed a recommendation system using XGBoost and scikit-learn, resulting in a 20% increase in customer engagement
- * Collaborated with the data engineering team to integrate machine learning models into the company's data warehouse, improving data quality and consistency
- * Developed and maintained a data catalog using Python and scikit-learn, enabling data discovery and reuse across the organization

EDUCATION

Master of Science in Computer Science
